

INSTALLATION OF THE MONTH

Custom Home Integration is a complete low voltage contracting resource for the homeowner that is building, remodeling or upgrading their home. They specialize in Home Theater, Structured Wiring, Whole House Audio/Video Distribution, Central Vacuum, Life Safety/Security, Telephone/Intercom and Integrated Home Systems. They design and install systems that comfortably integrate into the lifestyle of the homeowners and are easy for any member of the family to use.

This installation, including a Fujitsu P50XHA30WS, was performed in the winter of 2004 above the garage of a lake home, in Minnesota. The Client's goal for this room was to make it a fun environment for family and friends while vacationing at the lake home.
